2. The following is an examiner's statement of reasons for allowance:

Art Unit: 1772

A review of applicants' argument made in the amendment filed on 4/7/2006 and a review of the instant amended claims has convinced the examiner that the claims are allowable over the applied prior art of record. The prior art fails to teach a combination of a display strip and a plurality of product-enclosed bags bonded by heat-sealing to the strip with a sealant layer, said sealant layer comprises a single layer mixture of an adhesive component and a component for cohesion failure, that the sealant layer is broken without damaging the structure or appearance of the bag, and that the adhesive component is selected from the group consisting of polypropylene, a copolymer of propylene and any other alpha olefin and a low density polyethylene or that the component for cohesion failure is a styrene polymer, polybutene-1, or their combination. Also, no evidentiary support could be provided to support the position that the instant claimed invention would have been obvious to one having ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
